

```
--fixed-value    use string equality when comparing values to 'value-pattern'
-e, --edit       open an editor
--get-color      find the color configured: slot [default]
--get-colorbool  find the color setting: slot [stdout-is-tty]
```

Type

```
-t, --type <type>  value is given this type
--bool             value is "true" or "false"
--int              value is decimal number
--bool-or-int      value is --bool or --int
--bool-or-str      value is --bool or string
--path             value is a path (file or directory name)
--expiry-date      value is an expiry date
```

Other

```
-z, --null         terminate values with NUL byte
--name-only        show variable names only
--includes         respect include directives on lookup
--show-origin      show origin of config (file, standard input, blob, command line)
--show-scope       show scope of config (worktree, local, global, system, command)
--default <value> with --get, use default value when missing entry
```
